United States Secretary of Defense William Cohen stated in a press briefing, while commenting on new technological threats possibly held by terrorist organizations:

> Others are engaging in an eco-type of terrorism whereby they can alter the climate, set off earthquakes, (and) volcanoes remotely, using the use of electromagnetic waves.

This quote is taken from an April 1997 counterterrorism conference sponsored by former Senator Sam Nunn, quoted from "DoD News Briefing, Secretary of Defense William S. Cohen, Q&A at the Conference on Terrorism, Weapons of Mass Destruction, and U.S. Strategy," held at the University of Georgia-Athens, Apr. 28, 1997. This statement overlooked the fact that HAARP was a secret Soviet Union-US joint project during the Cold War.

HAARP is a land based, sea based, air based, space based integrated global weapons system developed from Tesla technology. It was secretly co-developed by the Soviet Union and the United States as the 'Woodpecker Project' during the Cold War, at the Livermore Nuclear Weapons Lab and in the Soviet Union. The program was secretly funded under the cover of National Ballistic Missile Defense and the Star Wars program. Some of the applications of HAARP are described in the original patent held by the inventor Dr. Bernard Eastland, and in the US Congressional resolution HR 2977 "Space Preservation Act of 2001". They include missile defense, chemtrails, communications disruption, subsurface mineral exploration from space, rogue waves, tectonic events, weather modification, with emphasis on mind control.

EUROPEAN PARLIAMENT INVESTIGATION OF HAARP

The dangers of HAARP were investigated in a 1998 European Parliament hearing: "The HAARP project and non-lethal weapons: Experts alarmed - public debate needed":

> The hearing on the HAARP project and non-lethal weapons was held in connection with a European Parliament own-initiative report, to be drawn up by Maj Britt THEORIN (PES, S), on the possible use of military resources in environmental strategies… Non-lethal (or non-deadly) weapons - a varied scenario… Dangers to health and the environment… The risk of abuse in democratic societies… The HAARP project...
> SOURCE: http://www.europarl.europa.eu/press/sdp/backg/en/1998/b980209.htm

The hearing and investigation concluded with a report issued in 1999:

January 14, 1999: EUROPEAN PARLIAMENT REPORT ON HAARP
http://www.europarl.europa.eu/sides/getDoc.do?pubRef=-//EP//TEXT+REPORT+A4-1999-0005+0+DOC+XML+V0//EN
PDF: http://www.europarl.europa.eu/sides/getDoc.do?pubRef=-//EP//NONSGML+REPORT+A4-1999-0005+0+DOC+PDF+V0//EN

The findings were laid out in the European Parliament report, but there was little follow-up or further investigations. The list of HAARP facilities around the world explains why:

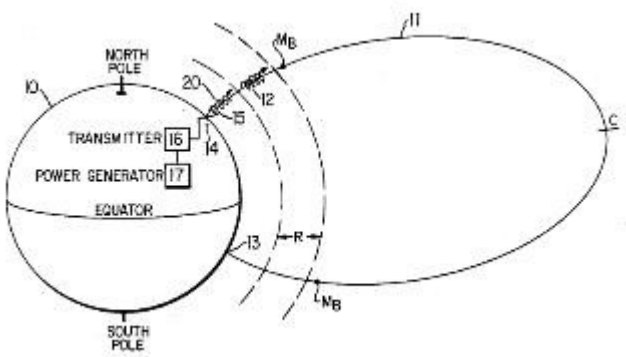
> Concluding that HAARP is a breach of international law. All the implications of the new weapons systems should be examined by independent international bodies. Further international agreements should be sought to protect the environment from unnecessary destruction in war.

The United States Government refused to participate in any aspect of the investigation:

> "[The European Parliament]… regrets the repeated refusal of the United States Administration to send anyone in person to give evidence to the public hearing or any subsequent meeting held by its competent committee into the environmental and public risks connected with the high Frequency Active Auroral Research Project (HAARP) programme currently being funded in Alaska."

DR. BERNARD EASTLUND AND THE HAARP PATENTS

HAARP is a large phased array electromagnetic wave generator located in Alaska. The involvement of Dr. Bernard Eastlund in its creation has been well documented in books and in magazine articles and newspapers. During the period in which many of the books and articles were written, Dr. Eastlund was under a 15 year confidentiality agreement with ARCO (The Atlantic Richfield Company). That confidentiality agreement has now matured. This web site will present information regarding the development of the ARCO patents and the founding of APTI (Now owned by AES Corporation) the corporation managing the HAARP facility. (The ARCO patents referred to in this web site are three patents that Dr. Eastlund assigned to ARCO because he was a consultant. They are 1) U. S. Patent 4,686,605, 4,712,155 and 5,038,664.)
SOURCE: http://www.eastlundscience.com/HAARP.html



U. S. PATENT 4,686,605

Development of HAARP was the hidden agenda behind the large number of nuclear weapons tests, conducted by the US and Soviet governments, under the atmospheric testing program. Livermore Nuclear Weapons Lab scientist, Dr. Nicholas Christofilos was the inspiration for high altitude nuclear tests to develop HAARP and worked closely with Dr. Eastlund:

> HIGH ALTITUDE NUCLEAR EXPLOSIONS
> One of the inspirations for the ARCO patents came from Dr. Eastlund's friendship with Nicholas Christofilos, a research scientist at the Livermore National Laboratory who was the inspiration of a series of high altitude nuclear explosions. The residue of these tests was a high population of MEV electrons trapped in what are now referred to as the Van Allen belts. These electrons presented a danger to satellites because of their ability to penetrate solids, and to heat or disable materials in the satellites.

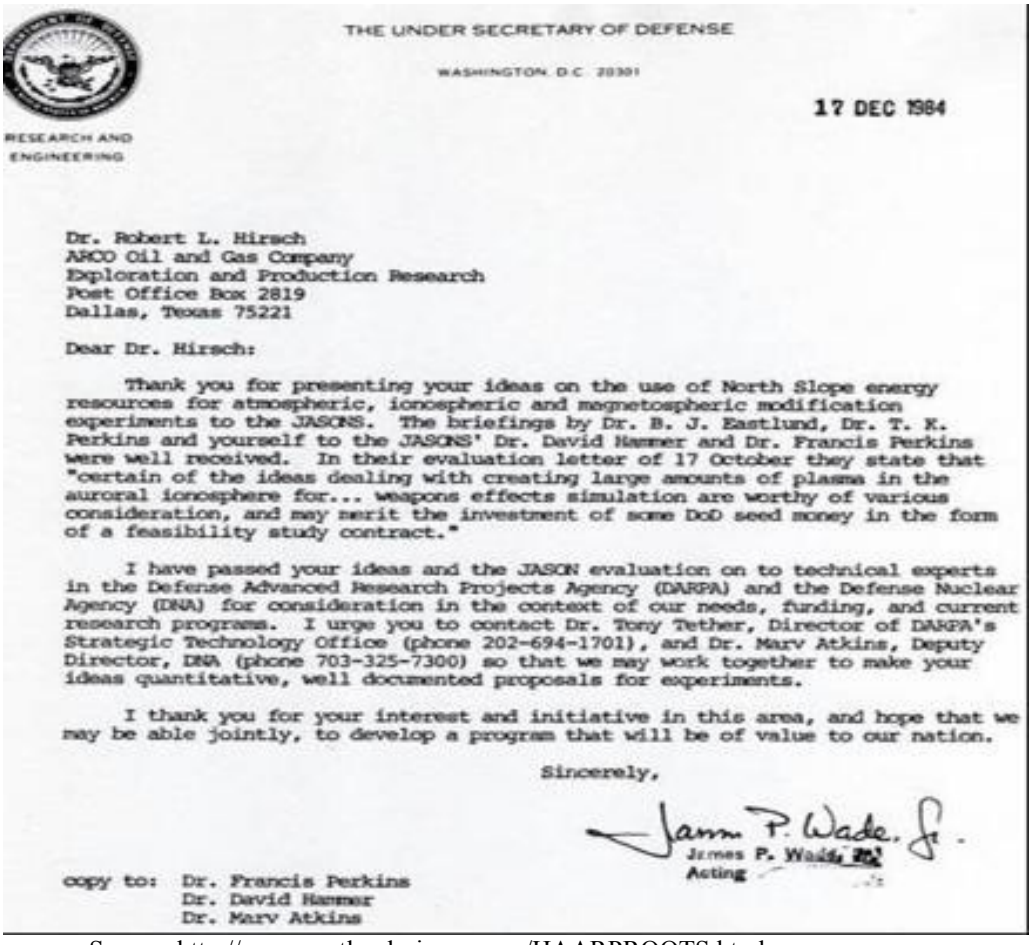
JASON SCIENTISTS DEVELOPED HAARP PROGRAMS



THE UNDER SECRETARY OF DEFENSE

WASHINGTON, D.C. 20301

17 DEC 1984

RESEARCH AND ENGINEERING

Dr. Robert L. Hirsch
ARCO Oil and Gas Company
Exploration and Production Research
Post Office Box 2819
Dallas, Texas 75221

Dear Dr. Hirsch:

Thank you for presenting your ideas on the use of North Slope energy resources for atmospheric, ionospheric and magnetospheric modification experiments to the JASONS. The briefings by Dr. B. J. Eastlund, Dr. T. K. Perkins and yourself to the JASONS' Dr. David Hammer and Dr. Francis Perkins were well received. In their evaluation letter of 17 October they state that "certain of the ideas dealing with creating large amounts of plasma in the auroral ionosphere for... weapons effects simulation are worthy of various consideration, and may merit the investment of some DoD seed money in the form of a feasibility study contract."

I have passed your ideas and the JASON evaluation on to technical experts in the Defense Advanced Research Projects Agency (DARPA) and the Defense Nuclear Agency (DNA) for consideration in the context of our needs, funding, and current research programs. I urge you to contact Dr. Tony Tether, Director of DARPA's Strategic Technology Office (phone 202-694-1701), and Dr. Marv Atkins, Deputy Director, DNA (phone 703-325-7300) so that we may work together to make your ideas quantitative, well documented proposals for experiments.

I thank you for your interest and initiative in this area, and hope that we may be able jointly, to develop a program that will be of value to our nation.

Sincerely,

James P. Wade, Jr.
James P. Wade, Jr.

Development of the HAARP system was funded by DARPA, with Marconi Corporation (US) involvement, merging in 1999 with BAE Systems Inc., a British defense and aerospace company as the main contractor.

Jason scientists such as Dr. Christofilos, the successors to the Manhattan Project scientists from WW II, worked along with some Manhattan Project scientists (Dr. Enrico Fermi did research at Los Alamos nuclear weapons lab on “solitons” or standing waves known as “rogue waves” in the HAARP applications) under contract to the Dept. of Defense to develop HAARP applications. They were paid through the MITRE Corp., a research company started by MIT faculty, and later expanded. MITRE Corporation was later reported, by investigative reporter Christopher Bollyn, to have been involved in 911. Since HAARP technologies were used in the 911 False Flag terrorist event, it is no surprise.
SOURCE: Bollyn, Christopher, "Is MITRE Corp. The Trojan Horse of 9/11?" April 2005

> "Ptech was with Mitre Corporation in the basement of the FAA for two years prior to 9/11 and their specific job was to look at interoperability issues the FAA had with NORAD and the Air Force, in case of an emergency," the former risk and software specialist Indira Singh told the 9/11 Citizens' Commission hearings.
>
> So this mysterious little company from Quincy, Massachusetts, whose software was on all the critical computer networks of the U.S. government and military, we were told, was Arab-owned, financed, and linked to terrorists. This, however, was quite false; Ptech was simply an Arab "cut out."

HR 2977: SPACE PRESERVATION ACT OF 2001

> **Congressional Research Service Summany:**
> 10/2/2001--Introduced.
> Space Preservation Act of 2001 - Reaffirms U.S. policy that activities in space should be devoted to peaceful purposes.
> Directs the President to: (1) ban U.S. space-based weapons and remove from space any existing U.S. weapons; (2) terminate research and development, testing, manufacturing, production, and deployment of all such weapons; and (3) direct the U.S. representatives to the United Nations and other international organizations to work toward negotiating, adopting, and implementing a world agreement banning space-based weapons.
> PDF HR 2977: http://www.govtrack.us/congress/billtext.xpd?bill=h107-2977

In 2001, Mr. Alfred Labremonte Webre a Yale Law School graduate and long active in preventing the weaponization of space, authored a House of Representatives bill for Congressman Dennis Kucinich. Known as the Space Preservation Act of 2001, it is the best description of the HAARP weapons system as a WMD. This is the only time that chemtrails have been mentioned in Congressional legislation, and the inclusion of chemtrails in the bill was omitted when it was reintroduced the following year.

Chemtrails were an essential modification program for development of HAARP, and were first described August 11, 1987, in HAARP patent # 4,686,605: “Method and apparatus for altering a region in the earth's atmosphere, ionosphere, and/or magnetosphere”:

> It has also been proposed to release large clouds of barium in the magnetosphere so that photoionization will increase the cold plasma density, thereby producing electron precipitation through enhanced whistler-mode interactions.

CIA AND HAARP

The CIA was heavily involved with the development of HAARP and its applications through the secret MKULTRA program, and defense contractors, and now they own it:

> The patents described below were the package of ideas which were originally controlled by ARCO Power Technologies Incorporated (APTI), a subsidiary of Atlantic Richfield Company, one of the biggest oil companies in the world. APTI was the contractor that built the HAARP facility. ARCO sold this subsidiary, the patents and the second phase construction contract to E-Systems in June 1994.
>
> E-Systems is one of the biggest intelligence contractors in the world, doing work for the CIA, defence intelligence organisations and others. US$1.8 billion of their annual sales are to these organisations, with $800 million for black projects-projects so secret that even the United States Congress isn't told how the money is being spent.
>
> E-Systems was bought out by Raytheon which is one of the largest defence contractors in the world. In 1994 Raytheon was listed as number 42 on the "Fortune 500" list of companies. Raytheon has thousands of patents, some of which will be valuable in the HAARP project. Twelve patents are the backbone of the HAARP project, and are now buried among the thousands of others held in the name of Raytheon.
> SOURCE: http://www.policestateplanning.com/uk_parliament.htm

In 1995, the *Wall Street Journal* reported 'Raytheon to Acquire E-Systems for $64 a Share, or $2.3 Billion', essentially turning over the HAARP patents to the CIA.

Multiple HAARP Applications

US NAVY Portable Radar

DR. GORDON MACDONALD: ENVIRONMENTAL WARFARE

In 1968 a prophetic book was published, ***Unless Peace Comes: A Scientific Forecast of New Weapons***, edited by Nigel Calder, a research scientist and Editor of ***The New Scientist***. At the peak of the Cold War, sixteen eminent scientists from six countries contributed a chapter projecting warfare in the future from the viewpoint of their own disciplines. Perhaps the most disturbing and foreshadowing was the chapter on environmental warfare by Dr. Gordon J.F. MacDonald, "How to Wreck the Environment". An Associate Director of the Institute of Geophysics and Planetary Physics at the University of California, Los Angeles, he also participated in national science policy-making as a member of President Johnson's Science Advisory Committee. A Jason scientist and elite scientific insider during the Cold War, he was the chief architect of the HAARP program known as "tectonic warfare", an aspect of the hardware and software of 'how to wreck the environment'. In this prophetic chapter he described 'weather modification', 'climate modification', 'earthquake modification', 'modification of oceans', and 'brain waves around the world' (mind control), all now recognized as HAARP programs or applications. In the last two pages, he reveals the intelligence agencies (such as CIA, MI6, Mossad) purpose for HAARP applications as "secret war and changing relationships":

> Eventually, however, means other than open warfare may be used to secure national advantage. As economic competition among many advanced nations heightens, it may be to a country's advantage to ensure a peaceful natural environment for itself and a disturbed environment for its competitors. Operations producing such conditions might be carried out covertly, since nature's great irregularity permits storms, floods, droughts, earthquakes and tidal waves to be viewed as unusual but not unexpected. Such a 'secret war' need never be declared or even known by the affected populations. It could go on for years with only the security forces involved being aware of it. The years of drought and storm would be attributed to unkindly nature and only after a nation were thoroughly drained would an armed take-over be attempted.

He concludes:

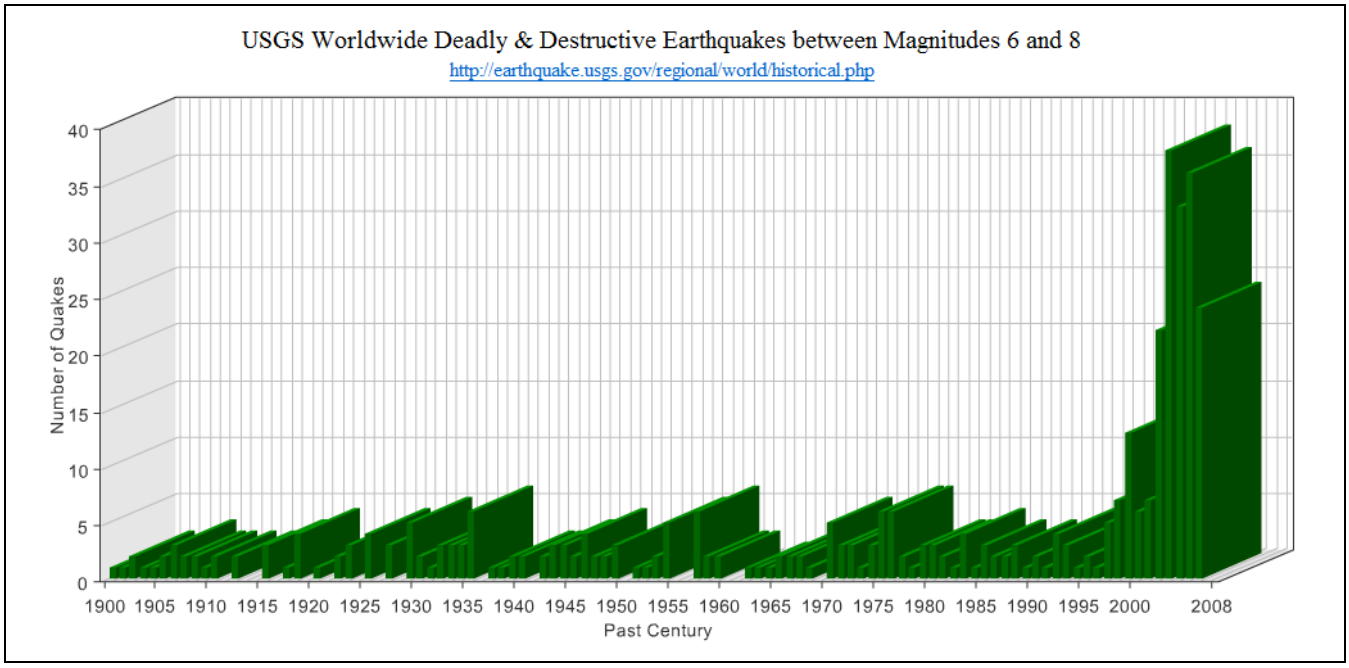
> Our understanding of basic environmental science and technology is primitive, but still more primitive are our notions of the proper political forms and procedures to deal with the consequences of modification. All experience shows that less significant technological changes than environmental control finally transform political and social relationships. Experience also shows that these transformations are not necessarily predictable, and that guesses we might make now, based on precedent, are likely to be quite wrong.
> Source: http://twm.co.nz/envwar.html

The fact that this chapter was written in 1968 indicates that advanced planning had already been developed for decades based on Tesla concepts, inventions, and technologies. Another indication that Tesla was of high interest to the National Labs is that the south boundary road for the Livermore nuclear weapons lab, where HAARP was co-developed with the Soviets during the Cold War, was named Tesla Avenue, probably as early as the 1950's. The 1984 letter mentioned earlier, from the US Undersecretary of Defense to ARCO inviting Bernard Eastland to present his research to the Jasons (on patents that led to the development of HAARP), was just a formality. In fact the Soviets had already introduced ULF over-the-horizon radar globally

A mile-long ULF transmitter at the Duga-3 array in Russia.

when the 'Woodpecker signal' officially went operational on July 4, 1976, the 200th anniversary of the United States. The Woodpecker signal broadcast bursts spaced at 0.1s(10Hz) on shortwave around 14MHz that made a knocking sound initially on shortwave transmissions globally, and was nicknamed 'Woodpecker' by ham operators. Such early interest in Tesla technologies in fact goes back to the early 20th century, and may have been the real purpose for development of nuclear weapons and the atmospheric testing program, in order to inject large amounts of ionized particles into the upper atmosphere in order to understand the earth's magnetic field and ionospheric-magnetospheric dynamics.

TECTONIC NUCLEAR WARFARE GOES OPERATIONAL



With the sale of the Eastland patents to Raytheon in 1995, the CIA and HAARP programs went operational with the 1995 Kobe earthquake in Japan. Geoscientists have noticed a series of unprecedented large off-scale environmental disasters since 1995. Various factors (foreshadowing, ULF transmissions detected, never before reported off-scale magnitudes, economic benefits) indicate these are HAARP events: 2001 Gujarat earthquake, 2004 Indian Ocean earthquake, 2005 Kashmir earthquake, 2005 Hurricane Katrina, 2006 Sumatra earthquake and tsunami, 2007 Black Sea storm, 2007 Niigata earthquake, 2008 Myanmar cyclone, 2008 China earthquake, 2010 Haiti earthquake, 2010 Chile earthquake, and most recently the 2011 Great Tohoku earthquake and tsunami causing the Fukushima global nuclear disaster.

In 2004, Leuren Moret wrote an article for the ***JAPAN TIMES*** predicting a major nuclear power plant disaster in Japan due to frequency of major earthquakes: "Japan's deadly game of nuclear roulette," May 23,2004, http://search.japantimes.co.jp/cgi-bin/fl20040523x2.html

Extensive forensic evidence indicates that the Fukushima disaster (2011 Great Tohoku earthquake and tsunami) was a HAARP triggered disaster:

(1) **Foreshadowing** – 2007 Niigata earthquake damaged a nuclear power plant in Japan,
(2) **MOX fuel** - illegal and covert placement of MOX fuel in Reactor 3 in September 2010 in violation of the Governor's 2002 order prohibiting placement of MOX fuel in any reactors in Fukushima Prefecture,
(3) **CIA Cyber Virus** - discovery of the CIA/Siemens Stuxnet virus in 63 computers in Japan in October 2010,
(4) **Mossad mule -** introduction of the Stuxnet virus to the Fukushima Daiichi nuclear power plant operating system by an Israeli security firm in the months prior to the March 11, 2011, earthquake and tsunami,
(5) **EISCAT Tromso Heater** - ionospheric heating experiment (reported by NASA scientists May 18 at MIT and reported online in TECHNOLOGY REVIEW), by the EISCAT Tromso, Norway, HAARP facility up to 3 days prior to the earthquake,
(6) **Gakona Transmitter** - Gakona magnetometer transmitted 2.5 Hz earthquake frequency for 3 days before earthquake,
(7) **Unprecedented Mega-scale Events** - off-scale magnitude 9 earthquake never occurred in 1200 years in Japan, and never reported in over 100 years since data collecting began, off scale 131' tsunami remeasured and reported by Japanese govt. in June 2011,
(8) **BP-DOE Overseers** - deep involvement in Fukushima disaster of BP operatives on both BP Gulf oil disaster and Fukushima disaster: BP-Obama-DOE (Chu/Koonan)-TEPCO,
(9) **CIA Disaster Playbook 101** - same disaster response (or lack of) at BP Gulf oil disaster and Fukushima disasters.

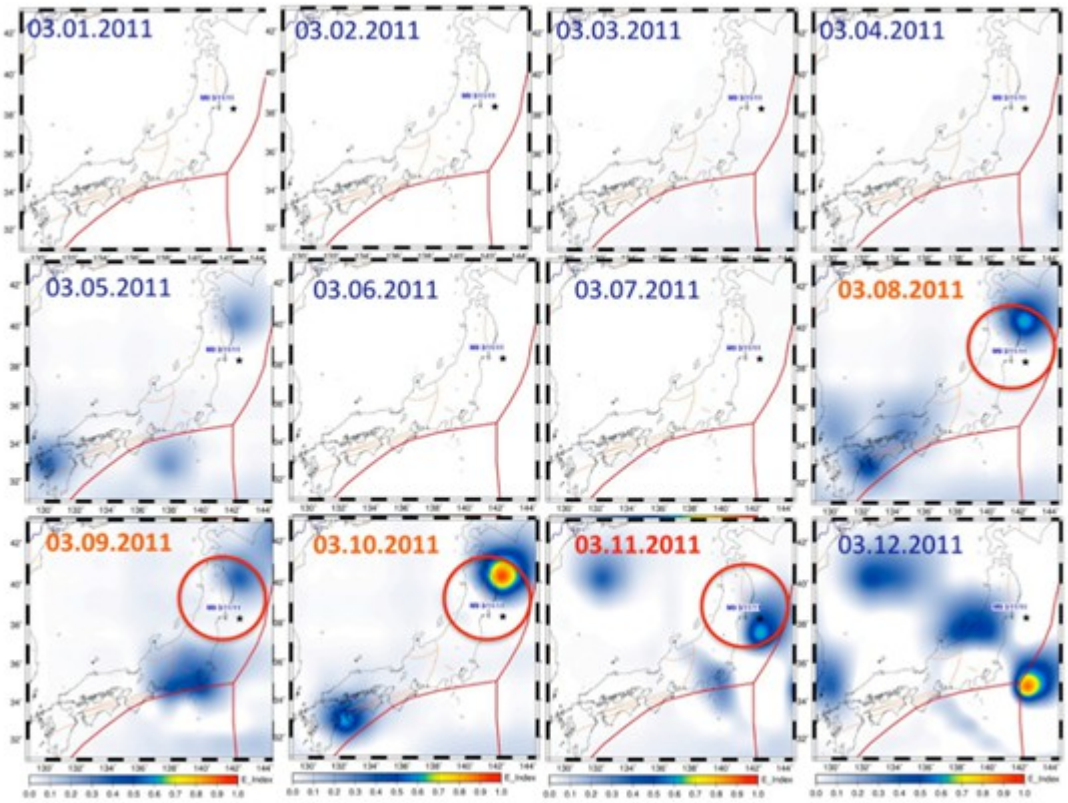
5. "Infrared emissions above the epicenter increased dramatically in the days before the devastating earthquake in Japan, say scientists" Technology Review, MIT May 18, 2011.

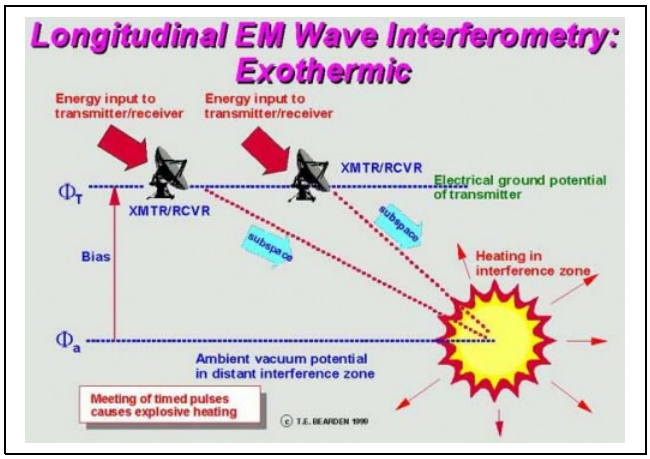


"Today, Dimitar Ouzounov at the NASA Goddard Space Flight Centre in Maryland and a few buddies present the data from the Great Tohoku earthquake which devastated Japan on 11 March. Their results, although preliminary, are eye-opening.

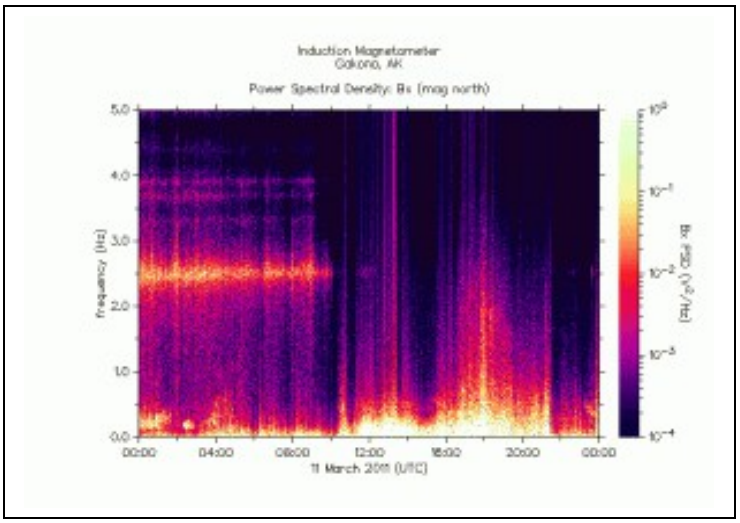
They say that before the M9 earthquake, the total electron content of the ionosphere increased dramatically over the epicentre, reaching a maximum three days before the quake struck.

At the same time, satellite observations showed a big increase in infrared emissions from above the epicentre, which peaked in the hours before the quake. In other words, the atmosphere was heating up."

A comment on this article mentioned that the EISCAT HAARP facility in Tromso, Norway, was conducting an ionospheric heating experiment in the weeks before this earthquake. The heating causes water pockets to boil in the fault zone, and the expanding steam helps to release the parts of the fault zone that are locked up.



6. HAARP Induction Magnetometer readings during timeframe of Japan earthquake for March 7-13, 2011.
   Transmission for three days just before the earthquake, of the HAARP 2.5 Hz earthquake frequency, occurred from the Gakona Alaska magnetometer and caused the earthquake on March 11, 2011.



7. NHK Newsline – "March 11th tsunami a record 40-meters high" June 13, 2011.
   YouTube: http://www.youtube.com/watch?v=zrwFSjUTeSg&feature=player_embedded

   "Japan's Meteorological Agency and researchers have determined that the tsunami of March 11th reached heights of up to 40 meters (131 feet) in some areas.

   Due to communication failures and blackouts as well as automatic tide-gauge stations being destroyed during the disaster, the precise height of the tsunami waves was unclear.

   Experts have looked into traces of each tsunami in the affected area and found that around 10-meter waves reached wide areas of Iwate, Miyagi and Fukushima Prefectures. They also found tsunami reached up to 40.5 meters in Miyako City in Iwate Prefecture, 37.8 meters in Noda village also in Iwate Prefecture, and 34.7 meters in Onagawa town in Miyagi prefecture.

   Based on the collected data, researchers are now working on discovering how the giant tsunami was triggered."

NHK TV DOCUMENTARY:

Nuclear : Collaborating to create a radioactive fallout contamination map

http://www.youtube.com/watch?v=yVzX3gAxp58&feature=player_embedded

Thus, the U.S. Department of Energy (DOE), under the directorship of Dr. Steven Chu (Secretary of Energy) and Dr. Stephen Koonin, is following in the Fukushima HAARP-radiation false flag operation the same methodology that they followed in the BP Gulf Oil Spill false flag operation.

Ms. Moret states, "Dr. Steven Chu received a $500 million grant from BP Oil prior to being appointed Secretary of Energy by newly elected President Obama. Obama also received $500 million from the British Crown two years prior to his election, to begin his election campaign for US President.. Upon his appointment as Secretary of Energy, Dr. Steven Chu appointed Dr. Stephen Koonin, chief scientist for BP, to run the DOE's science operations. The Queen of England personally owns BP."

Ms. Moret states, "Together, DOE/BP's Secretary of Energy Steven Chu and Dr. Stephen Koonin are doing the same thing at Fukushima that they did at the BP Gulf of Mexico oil spill with full approval by President Obama. Dr. Chu and Dr. Koonin increased the

exposure of the population both at Fukushima (radiation) and at the Gulf of Mexico oil spill (toxins), and they acted within the U.S. government on behalf of President Obama, so that effective action to prevent exposure could not be taken. With full Presidential oversight, the U.S. Government is increasing radiation exposure in the northern hemisphere from Fukushima, through Secretary of Energy Chu and Dr. Koonin on behalf of their benefactors the British crown and BP, with the same depopulation agenda result they had at the BP Gulf oil spill."

This document is under US copyright © Leuren Moret 2011
